

Introduction: Nomenclature & Formulas

Unit: Nomenclature & Formulas

Topics covered in this chapter:

Bonding.....	256
Chemical Formulas	258
Balancing Charges.....	259
Polyatomic Ions	263
Naming Ionic Compounds	266
Naming Oxyanions.....	270
Naming Acids	273
Naming Molecular (Covalent) Compounds	275

Standards addressed in this chapter:

Massachusetts Curriculum Frameworks & Science Practices (2016):

HS-PS2-6 Communicate scientific and technical information about the molecular-level structures of polymers, ionic compounds, acids and bases, and metals to justify why these are useful in the functioning of designed materials.

Use this space for summary and/or additional notes:
